Skills & Tools

UX

- User Research
- Usability Testing
- Task Flows
- Information Architecture
- Wireframing
- Personas
- Iterative Design
- A/B Testing Basics

UI

- High-Fidelity Prototyping
- Responsive Design
- Design Systems
- Component Libraries
- Interaction Design
- Visual Hierarchy
- Dark Mode
- Icon Design
- Accessibility (WCAG)
- Micro-Interactions
- Gestalt Principles

Tools

- Figma
- FigJam
- Photoshop
- Illustrator
- Notion
- Trello
- Loom
- Google Workspace
- GitHub
- VS Code
- Slack

Technical

- HTML5
- CSS3
- JavaScript (Basic)
- Version Control
- Optimization

Education

UI Design Program Certificate

- CareerFoundry (Dec. 2024 – Sept. 2025)
- Focus: UI Design, Frontend Development, Accessibility, and Prototyping

High School Diploma

- Eagle Academy, 2012

Summary

UI Designer delivering polished, production-ready interfaces grounded in strong visual hierarchy, component systems, and platform-accurate design. Skilled at translating user needs into clear intuitive screens that reduce friction and improve decision speed. Experience in Figma, responsive UI, accessibility, and scalable design systems for real product workflows

Project Experience

Zentra | Goal-based Savings App

- Designed a mobile-first interface focused on motivation and progress tracking, improving user clarity and reducing decision fatigue
- Created wireframes, prototypes, and refined high-fidelity UI using iterative testing and feedback
- Developed a reusable component library and visual design system ensuring consistent spacing, typography, and color application

SmiteForge | Smite 2 Companion App

- Designed dual-platform UI for both Apple HIG and material design
- Organized complex game data into clear layouts using hierarchy, spacing, and interaction patterns to improve scannability
- Created custom icons, UI assets, and dark-mode visuals to strengthen consistency and user engagement

Nitefind | Location-Based Recommendations App

- Designed responsive interface enabling rapid nightlife discovery through simplified decision flows and accessible navigation
- Conducted user interviews, synthesized insights, and translated research into wireframes and high-fidelity UI
- Built a UI framework with custom icons, responsive components, and accessible color contrast for mobile and desktop

Work Experience

X Bar | Denver, CO

Floor Manager & Lead Bartender | Jan. 2017 – Present

- Increased transaction speed by reorganizing the POS layout, removing redundant steps, and reducing friction during high-volume service
- Trained coworkers in efficient service patterns, task consolidation, and optimized workflow timing
- Coordinated nightly operations, allocating staff and resources to maintain continuous flow and prevent service bottlenecks
- Identified operational inefficiencies and redesigned task sequences to reduce delays and improve throughput
