Skills & Tools

UX

- User Interviews
- Surveys
- User personas
- Empathy mapping
- Task flows
- Information architecture
- Wireframing (low/mid/high fidelity)
- Usability testing & iteration

UI

- Visual design systems
- Typography & color theory
- Responsive layout (mobile-first)
- Dark mode & accessibility (WCAG)
- Micro-interactions & motion design

Tools

- **Design & Prototyping:** Figma, FigJam, Adobe Photoshop, Adobe Illustrator
- **Collaboration & Documentation:** Notion, Google Workspace, Trello
- **File & Media Sharing:** WeTransfer, Loom, Google Drive, Dropbox
- **Frontend Development:** HTML5, CSS3, basic JavaScript, Github, VS Code
- **Other:** TinyPNG, color palette & font pairing tools

Education

UI Design Program Certificate

- CareerFoundry (Dec. 2024 – Sept. 2025)
- Focus: UI Design, Frontend Development, Accessibility, and Prototyping

High School Diploma

- Eagle Academy, 2012

Summary

UI Designer combining creativity, technical fluency, and empathy shaped by years in high-volume hospitality. Skilled in Figma, HTML, CSS, and accessible design with a strong eye for color, layout, and flow. Experienced in simplifying large, complex information into clear, intuitive, and visually engaging digital experiences.

Project Experience

Zentra | Goal-based Savings App

- Developed a goal-based savings tool that reframes saving as a celebration of progress rather than a restriction or chore
- Designed and refined the app from paper prototypes to high-fidelity screens, applying user research, personas, usability testing, and motion design to shape the experience
- Delivered a cohesive visual system that reframed financial progress as success, building user trust and encouraging consistent engagement

SmiteForge | Smite 2 Companion App

- Set out to design a dual-platform native app for iOS and Android that helps players view stats, create builds, and track match history
- Researched both platform ecosystems to understand layout patterns and accessibility, then simplified dense game data into clear, digestible systems using dropdown structures and organized layouts
- Integrated custom iconography and visual design elements, resulting in an engaging, data-rich experience that resonated with real players and drew genuine user interest in future release potential

Nitefind | Location-Based Recommendations App

- Addressed the need for a location-based recommendations app by developing an app that helps users quickly find nightlife options that match their mood and schedule without relying on multiple apps
- Conducted first-hand research to identify user pain points, then designed a responsive platform featuring detailed venue overviews and quick-pick options for spontaneous nights
- Applied user insights, flow mapping, and refined iconography to create a cohesive, visually expressive interface that unifies design and function into one seamless experience

Work Experience

X Bar | Denver, CO

Floor Manager & Lead Bartender | Jan. 2017 – Present

- Managed high-volume operations/optimized daily workflows increasing team productivity and customer satisfaction
- Designed and implemented a reorganized POS interface to streamline transactions and improve sales speed
- Supervised and trained 10+ team members while maintaining quality, consistency, and guest engagement
- Applied data-informed strategies to improve efficiency, task prioritization, and guest experience under pressure
