Skills & Tools

UX

- User interviews
- Surveys
- User personas
- Empathy mapping
- Task flows
- Information architecture
- Wireframing (low/mid/high fidelity)
- Usability testing & iteration

UI

- Visual design systems
- Typography & color theory
- Responsive layout (mobile-first)
- Dark mode & accessibility (WCAG)
- Micro-interactions & motion design

Tools

- **Design & Prototyping:** Figma, FigJam, Adobe Photoshop, Adobe Illustrator
- **Collaboration & Documentation:** Notion, Google Workspace, Trello
- **File & Media Sharing:** WeTransfer, Loom, Google Drive, Dropbox
- **Frontend Development:** HTML5, CSS3, basic JavaScript, Github, VS Code
- **Other:** TinyPNG, color palette & font pairing tools

Education

UI Design Program Certificate

- CareerFoundry (Dec. 2024 – Sept. 2025)
- Focus: UI Design, Frontend Development, Accessibility, and Prototyping

High School Diploma

- Eagle Academy, 2012

Summary

UI Designer combining creativity, technical fluency, and empathy shaped by years in high-volume hospitality. Skilled in Figma, HTML, CSS, and accessible design with a strong eye for color, layout, and flow. Experienced in simplifying large, complex information into clear, intuitive, and visually engaging digital experiences.

Zentra | Goal-based Savings App

Built a goal-oriented savings app designed to make saving feel motivating rather than restrictive. Developed the concept from paper prototypes through high-fidelity design, applying user research, personas, usability testing, and motion design. Delivered a cohesive visual system that reframes financial progress as success and promotes user confidence through trust and clarity.

SmiteForge | Smite 2 Companion App

Designed a dual-platform native app for iOS and Android to help players view stats, create builds, and track match history. Researched both design ecosystems to ensure consistency and accessibility, simplifying dense game data into clear, digestible systems through organized layouts and dropdown structures. Integrated custom iconography and visuals, resulting in an engaging, data-rich experience that resonated with real players and generated strong user interest.

Nitefind | Location-Based Recommendations App

Created a responsive nightlife discovery app that simplifies finding the right place to go out. Identified the problem through first-hand research and designed a platform with both detailed venue overviews and quick-pick options for spontaneous nights. Applied user insights, flow mapping, and refined iconography to build a cohesive, visually expressive interface that unifies design and function into one streamlined experience.

Work Experience

X Bar | Denver, CO

Floor Manager & Lead Bartender | Jan. 2017 – Present

- Managed high-volume operations and optimized daily workflows to increase team productivity and customer satisfaction
- Designed and implemented a reorganized POS interface to streamline transactions and improve sales speed
- Supervise and trained 10+ team members while maintaining quality, consistency, and guest engagement
- Applied data-informed strategies to improve efficiency, task prioritization, and guest experience under pressure
